SUMMARY

IT support professional with 2 years across enterprise and managed service provider environments — currently running Tier 1 triage for an enterprise Epic EHR go-live, previously the primary support contact for ~70 client accounts and ~50 tickets per month at an MSP. Microsoft 365 (MS-900) certified; CompTIA A+ Core 1 passed, Core 2 in progress, with Active Directory and Intune next. Studies scripting and workflow automation on my own time to better understand the systems behind the tickets I work.

EXPERIENCE

Help Desk Analyst | UPMC (Contract)

Aug 2026 – Present

Full-Time · Remote

- Provide Tier 1 support during an enterprise Epic EHR go-live, taking high-volume calls from clinical and administrative end users through peak transition periods.
- Triage access, login, and application issues at intake — resolving at Tier 1 where possible, escalating with full symptom, impact, and steps-taken documentation where not.
- Work to contract SLAs in a high-volume queue alongside a fully distributed support team.

IT Support Specialist / Account Manager | IntermixIT

Sep 2024 – Mar 2026

Full-Time · Remote · Managed Service Provider

- Primary point of contact for ~70 client accounts, intaking and driving ~50 service tickets per month to resolution.
- Created, prioritized, tracked, and escalated tickets end to end in Autotask PSA, keeping queues moving and clients informed at every stage.
- Partnered with engineers on troubleshooting, project planning, procurement, and service delivery to close out client issues.
- Supported client and internal onboarding, maintained account data across Microsoft 365 and CRM, and led Quarterly Business Reviews across the account base.

Order Picker | ABARTA Coca-Cola

Sep 2023 – Apr 2024

Full-Time · Maintained accuracy and quality control across hundreds of daily orders in a fast-paced warehouse.

SELF-STUDY PROJECTS

Built on my own time while learning these tools — not production systems.

AI Customer Support Automation System — Zapier, OpenAI, Airtable, Gmail, Slack

Built to learn how no-code automation platforms handle branching logic and API calls: classifies incoming requests, routes them by type, drafts replies, and logs to Airtable.

AI Text Analysis & Image Generation Apps — Python, Azure AI Language, Azure OpenAI, Streamlit

Built to get hands-on with Azure AI services, API authentication, and cloud deployment. Text app detects language, extracts entities, and redacts PII; companion app generates images from prompts.

TECHNICAL SKILLS

Help Desk & Support: Tier 1 Triage · Call Intake & Escalation · Ticketing (Autotask PSA) · Troubleshooting · End-User & Remote Support · Onboarding · Hardware/Software · Documentation · SLAs

Platforms & Tools: Microsoft 365 · Windows 10/11 · Epic (end-user support) · Active Directory & Intune (learning) · CRM

Professional: Client Communication · Prioritization Under Volume · Technical Documentation · Self-Directed Learning

Learning / Familiar With: Power Automate · Python · REST APIs · Azure AI · n8n · Zapier · Git

CERTIFICATIONS

- Microsoft Certified: Microsoft 365 Fundamentals (MS-900) — Microsoft
- CompTIA A+ Core 1 (220-1201) — Passed July 2026
- CompTIA A+ Core 2 (220-1202) — In Progress
